

REASONS FOR ALLOWANCE

The following is an examiner's statement of reasons for allowance:

A search of the prior art failed to uncover a reference that teaches the recited reaction with the catalyst of formula III. The search also failed to uncover a reference that provides a basis to modify a known reaction of a compound of formula II to include the catalyst of formula III. For example US Patent Nos. 5,563,309 and 6,258,979 fail to provide a basis to modify a known reaction of a compound of formula II to include the catalyst of formula III.

With regard to any double patenting issues over copending 11/795441, the examiner cites MPEP § 84 ("The "provisional" double patenting rejection should continue to be made by the examiner in each application as long as there are conflicting claims in more than one application unless that "provisional" double patenting rejection is the only rejection remaining in at least one of the applications.").

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
